Enraptured about the ever-evolving world of technology. Always learning and ready for new challenges

PROFESSIONAL EXPERIENCE

Junior Software Developer (11/2024 - Present)

Providus Technologies Ltd

- At Providus, I worked on multiple projects, alongside learning tools of the trade. I had to adapt to their ways of development, joining their teams in internal projects such as a leave management system where the system was used company wide, built on a JAVA SpringBoot back-end, utilising RESTful APIs, a PostgreSQL database and a ReactJs front-end. I also participated in the development of a dashboard for their QA teams to track their milestones, built on a JAVA SpringBoot back-end, a PostgreSQL database and utilising NextJs as the front-end. Those two apps were deployed on GCP using their CloudRun and Kubernetes clusters.

Software Development intern (08/2023 - 10/2023)

Leal Communications and Informatics (LCI) Ltd

- Assisted in the development of Web Solutions for a full stack app, built on a JAVA SpringBoot back-end, a PostgreSQL database, and the PrimeFaces Framework.

- Assisted in the maintenance of their previous projects as part of my internship, learning how to refine and refactor code, following design and development principles of SpringBoot.

- Created User Manuals, and testing Web Applications following QA principles such as whitebox, blackbox, edge case, and smoke testing.

EDUCATION

BSc (Hons) Business Information System (10/2021 - 10/2024)

University of Technology, Mauritius

- Second Class, First Division with honours.

John Kennedy College(2014 - 2021)

- Pass at both SC and HSC level.

LANGUAGES

- English, written and spoken
- French, written and spoken.

SKILLS

- JAVA
- ReactJs
- CSS
- Object Oriented Programming
- RESTful APIs
- Code Review
- Coding Standards

- SpringBoot
- Google Cloud Platforms
- NextJs
- JAVASCRIPT
- GIT
- Agile development
- Maven dependency management

- Containerization
- Databases(PostgreSQL, MySQL)
- HTML
- TYPESCRIPT
- Google Suite
- Microsoft Office suite
- Software documentation
